NÉNUPHARS MAGIQUES

Ces 6 fleurs en papier flottent dans l'eau et s'ouvrent comme de vrais nénuphars.

1. Découpe ces six fleurs en suivant les contours des pétales.
2. Plie les pétales vers le cœur de la fleur en suivant les pointillés.
3. Pose les fleurs fermées à la surface d'un récipient rempli d'eau.
4. Attends un peu et tu vas voir, les fleurs vont s'ouvrir doucement comme par magie.
5. Dessine d'autres fleurs pour refaire l'expérience.
